

# Senior AI Engineer Resume

[linkedin.com](#) | [github.com](#)

Full-stack, AI engineer shipping AI to production with proven return on investment

## Recent Work Experience

### Senior AI Engineer – Global e-commerce platform

Jun 2025 – Present

- Pioneered real-time semantic product search, lifting search-to-purchase conversion by 7% through sitewide A/B tests
- Led the launch of *ShopGuide*, a shopping assistant that recommends products and bundles, cutting cart abandonment by 10% (Pydantic AI + FastAPI).
- Enabled teams to ship reliable, cost-efficient AI by designing inference foundations, increasing AI evaluation scores over time by 30% through LLM-as-judge evaluations.

### Software Engineer – B2B SaaS analytics platform

Jan 2023 – May 2025

- Built microservices and event pipelines to unify customer events, letting product teams ship 45% more experiments with FastAPI.
- Delivered an Insights API adopted by 8 enterprise pilots to expose increase on core KPIs (conversion, retention) directly in product dashboards.
- Set up CI/CD and containerized services, cutting new service bootstrap time to 5 days from 2 weeks.

### Junior Software Engineer – Applied AI lab

Jan 2022 – Dec 2022

- Shipped internal tools that raised visitor to account conversion by 6%, using React front-ends and FastAPI back-ends.
- Added automated tests and release checks, pushing regression coverage to 85% with pytest and Playwright.

## Skills & Expertise

AI | Pydantic AI, LLM inference & evaluation (LLM-as-judge), RAG, guardrails

Frontend | React, TypeScript, CSS

Backend | Python (FastAPI), TypeScript (React / Next.js), testing (Playwright)

DevOps | Containers (Docker), GitHub Actions, Grafana

Data | PostgreSQL (pgvector), Redis, Databricks, vector search

## Industry Leadership

Contributed examples to Pydantic AI and FastAPI; authored practical guides on LLM evaluation and retrieval; frequent internal tech talks.

## Selected Projects

### TaskFlow Copilot (SaaS, side project)

2024

- Built and launched an end-to-end SaaS onboarding 50+ teams with multi-tenant auth, usage-based billing, and telemetry, using FastAPI services, Pydantic AI agents, and a React front end.
- Published on a workplace app marketplace, reaching 30+ org installs, and open-sourced a sanitized template on [GitHub](#).

## Education

BS, Computer Science – Public Research University (USA)

2018 – 2021

## Languages

English (Native)
